

**Scope Fluidics S.A.** is a biotechnology company engaged in designing and developing innovative projects based on microfluidic technologies in **medical diagnostics and healthcare**. After the sale of the PCR|ONE project to Bio-Rad Laboratories Scope Fluidics, we focus on the development of Bacteromic and on new projects focused on the greatest global market needs, where the development of new technologies can lead to breakthrough functionality of solutions and utility value.

We work in dynamic, young project teams, with the competence to carry out the project from the conceptual phase, through prototyping, verification, validation, introduction to production and to the market. As a part of the dynamic development of our portfolio of projects, we are looking for a person for the position: **Quantitative Market Researcher**.

**Job position:**

## Quantitative Market Researcher

**Headquarter:**

*Ogrodowa 58, Warsaw*

**Our requirements:**

- Master degree in market research, statistics, psychology, or sociology.
- 2 years in market research and statistical analysis (open to final year students for more junior role).
- Knowledge in survey design and data collection methods.

# SERWIS POŚREDNICTWA PRACY PTBRiO

- Proficient in presenting quantitative data and using relevant presentation tools.
- Basic understanding of statistics, sample selection, and key statistical measures.
- Ability to work autonomously and identify tasks and challenges.
- Strong analytical skills and the ability to collaborate across various scientific disciplines.
- Proficiency in English.

## Nice to have:

- Medical field experience.
- Advanced statistical knowledge.
- Startup experience.

## Your responsibilities:

- Developing methodologies and preparing surveys with a focus on biotech-specific issues.
- Presenting understandable results for non-specialists; preparing reports and presentations tailored to biotech markets.
- Analyzing secondary reports and studies to prepare focused conclusions and recommendations.
- Setting standards and benchmarks for biotech product assessments and market analysis.
- Seeking innovative survey solutions in the medical market.
- Working with various departments to understand research needs and communicate findings, focusing on biotech venture development.
- Project documentation maintenance, ensuring compliance with industry standards and legal regulations.

## We offer:

- Full-time job in our growing discovery team.
- Possibility to work in agile organization, on disruptive projects in BioTech startups environment.

# SERWIS POŚREDNICTWA PRACY PTBRiO
